The Group has 500 companies and locations in 50 countries on 5 continents with €15.7 billion revenue and 49,700 employees.

JUNIOR AI SOLUTIONS ARCHITECT

EXTERNAL VACANCY

Reports to: Finance Director
Location: Office based in Oldbury, West Midlands, United Kingdom (UK)
Hours of work: Monday to Thursday 8.30am to 5.00pm with half hour lunch break each day and 8.30am to 1.30pm with no lunch break on Friday of each week – 37 hours in total, paid monthly

voestalpine Metsec plc is the UK's largest specialist cold roll-forming company providing products for the UK construction and manufacturing industries. We are seeking an enthusiastic and pro-active Junior AI Solutions Architect to join and strengthen our existing work in the field of artificial intelligence. This permanent role supports the design and delivery of AI solutions using Microsoft's cloud and productivity stack. The person will also lead internal training sessions to help teams adopt AI tools effectively. It's hands-on, collaborative, and ideal for someone who's excited to explore everything AI can offer.

Person specification

- » Degree in computer science, data science or a related field
- » 2-4 years' experience in the field of data science, Microsoft Cloud or AI
- » Familiar with Microsoft Cloud and Data Platform (e.g. Azure AI, Copilot Studio, Microsoft Fabric, Power Platform, etc.)
- » Strong enthusiasm for AI and its applications across industries
- » Either possess or working towards official "Microsoft Certified" Certification
- » Well organised, professional and able to work under pressure
- » Responsible for achieving objectives on own initiative, as well as part of a team
- » Able to prioritise workload, meet deadlines and pay attention to detail
- » Be able to explain AI concepts clearly to non-technical users
- » Must be eligible and able to prove you can work in the UK as the Company does not hold a sponsorship license.

While we have outlined our ideal candidate above, we welcome applicants who may not meet every requirement but possess relevant experience and a strong passion for learning.

Your responsibilities

- » Design and deliver internal training on Microsoft AI tools, including Azure AI and Copilot Studio
- » Create learning materials and onboarding guides for Copilot, Power Apps, and Power Automate
- » Run internal AI labs and pilot programs to explore use cases and drive adoption
- » Apply Microsoft Responsible AI principles and ensure GDPR and group IT compliance in all AI initiatives
- » Collaborate with Metal Forming Division and other voestalpine companies on AI projects
- » Identify AI opportunities across departments and prototype solutions using Microsoft Fabric and Azure Synapse Analytics
- » Build and deploy models using Azure Machine Learning and Azure OpenAI Service
- » Develop Power Apps and Power Automate flows to streamline and improve business processes.

Post date: Tuesday 28th October 2025
Package: Competitive salary, Company pension scheme, health cash plan, life assurance, 33 days holiday (including statutory days), discounted gym membership, cycle to work scheme and an employee assistance programme.
To apply: We look forward to receiving your CV at metsec.hr@voestalpine.com
